

COVID-19 POLICY

This policy is subject to change, in light of updated UK Government advice and has been formulated to support the delay of the spread of the pandemic whilst minimising impact on our stakeholders and the UK food supply and utility services industries. We operate in a defined critical sector and will continue to focus on minimising the risk of spreading the virus in all our operations.

- We have stopped all 'external' face to face meetings
- Delivery drivers are to maintain the social separation distance at all times and remain in restricted movement areas, at least 2m from other people. Screens between drivers and weighbridge staff are in use and handwashing facilities on arrival and prior to departure from OMEX sites is facilitated in a segregated, single person welfare block
- Gatherings of more than 2 people are not permitted on any OMEX site
- Any visit to a site with a known COVID-19 infection or where COVID-19 isolation is in place will be communicated by nominated logistics personnel

All suppliers and customers should be aware that all parts of the business are operating with full capacity, with due regard for all methods of control of spread of the virus. Employees are regularly informed of the current situation and provided with the latest .GOV information via a single point of communication and know who to contact with any questions or in the event of needing to self-isolate.

Home working is in place for all employees whose role permits it.

Any employee returning from foreign travel will self-isolate for a period of 7 days.

All OMEX sites display the latest .GOV advice notices that will be strictly adhered to.

At this time of a high level of restrictions, we have robust hygiene and business continuity management plans in place. We maintain a list of parallel working skills and have carried out cross training to enable staff to cover in the event of a colleague being unavailable.
