

COVID-19 POLICY

This policy is subject to change and is regularly reviewed in light of updated UK Government guidance. It has been formulated to support the delay of the spread of the pandemic, whilst minimising the impact on our stakeholders and the UK food supply and utility service industries.

With the success of the UK vaccination programme and a fall in hospitalisation rates, UK Government restrictions are being eased as part of the roadmap to normal life.

We will continue to focus on minimising the risk of spreading all variants of the virus in our operations and safeguarding our employees, contractors, visitors and the general public, whilst still providing a high level of service.

Suppliers and customers should be aware that all parts of the business continue to operate as normal, with due regard to all methods of control of spread of the virus.

Employees are regularly informed of the current situation and provided with the latest .GOV information via a single point of communication and they know who to contact with any questions or in the event of needing to self-isolate and we continue to have robust hygiene procedures and business continuity management plans in place.
