Job Profile			
<p><u>The Company</u> OMEX is the market leader in liquid fertilisers in the UK and manufactures and exports a unique range of plant nutrients and crop health promoters to over 60 countries worldwide.</p> <p><u>Key Duties:</u></p> <ul style="list-style-type: none"> • Quality Control of manufactured products and raw materials • Documenting test results and reporting these where necessary • Production of Safety Data Sheets for products and raw materials, and subsequently assign CLP label requirements and transport classifications. • Production of Certificates of Analysis, and other documentation relevant to product registration • Production of Laboratory samples of current formulations • Production of samples for external analysis • Performing routine analysis of products as part of the quality control process • General laboratory housekeeping <p><u>Candidate Profile</u></p> <ul style="list-style-type: none"> • The candidate would ideally have a degree in Chemistry or a related field, however other qualifications (HNC/HND) or relevant experience will be considered • The candidate must have a good background understanding of Chemistry and experience working with complex mixtures is desirable, though not essential. 			

- Experience of working in a busy, industrial laboratory is desirable, but not essential as full training will be provided
- The candidate must have excellent communication skills, and to work well within a busy team. They must be able to work competently, and independently once training has been given.
- The role requires a good mathematical ability and computer literacy
- Excellent organisational skills are required, along with the ability to work to deadlines
- The candidate must be self-motivated and have a desire to develop their job role to suit the company needs.
- This role is predominantly shift based. The hours are 06:00-14:30 and 13:30-22:00 on alternating shifts. At less busy times, office hours of 08:30-17:00 may be observed but notification will be given prior to undertaking
- Clean UK driving licence as some intersite travel may be required.

Previous laboratory experience is necessary, but may be in the form of either work-based experience, or a strong academic background; however, full training will be given on laboratory protocols and the use of specialist equipment

Benefits

Excellent remuneration package, including a Contributory Pension Scheme, contributory health care scheme, subsidies daily lunch allowance
