Tank Mix Guidelines

- Ensure sprayer tank is clean and free from residue of any previous products
- Half fill the sprayer before adding products.
- Allow time for one product to fully disperse before adding the next.
- Spray the mixture straight away and avoid leaving in the sprayer overnight.
- Check the inside of the sprayer tank for any residue after emptying each tank.
- The source and quality of water can have an impact on the physical compatibility of different chemicals
- If in doubt conduct a bucket test prior to filling the sprayer.

These tank mixes have been tested for physical compatibility at recommended rates of use and will mix with each other. No tests have been undertaken on crop safety, product performance or sprayer tank compatibility, therefore use is at the grower's own risk.

When using tank mixes always follow the statutory conditions of all tank mix partners. Use plant protection products safely. Always read the label and product information before use.

For further information on OMEX products and compatibilities, refer to www.omex.co.uk or contact OMEX Agriculture Ltd on 01553 760011.

Sugar Beet Recommendations

A single application of the total nitrogen requirement of the crop plus a herbicide can be applied immediately post drilling with Nitroflo Solo (OMEX Nitroflo 30N plus DIDIN) on **medium** soils up to a total of 120 kg/ha N. On sands and very light soils the single application **must be carried out at least 10 days before drilling** up to a maximum of 120 kg/ha N and can include Gallup Hi-Aktiv, useful in direct drilling situations on light land. For split nitrogen applications, the first application can be made with Nitroflo, including a pre-emergence herbicide and water. The main post-emergence dressing can be made with Nitroflo or Nitroflo-S, applied with streamer bars, after the 6-leaf stage.

NK Compounds

British Sugar has suggested that an early top-dressing of a small amount of potash with the first nitrogen application may be useful to ensure good early growth. An application of 300 kg/ha (250 l/ha) of OMEX 16-0-8 is recommended, applied with a pre-emergence herbicide. 250 l/ha OMEX 16-0-8 will apply 48 kg/ha N and 24 kg/ha K₂O

fluazinam	SuperMn
imazamox + quinmerac	Folex B
lambda-cyhalothrin	Folex Cu
mancozeb	Folex K
mancozeb + metalaxyl – m	Folex Mg
mesotrione	Folex N
metconazole	Folex P
metconazole + mepiquat chloride	Folex PZ
nicosulfuron	Folex Se
picolinafen + flufenacet	Folex Zn
prochloraz	Manganese 17.5%
prochloraz + tebuconazole	Oilseed Extra
prothioconazole	Protein Plus
pirimicarb	Sulphomex
sulphur	Gard S
spinosad	Kelpland
spirotetramat	Kelpomex
tebuconazole	Organomex Range
	NA13
	SW7
	Clear Compound fertilisers (eg 7-20-0; 17-8-0)
	Zynergy
	The following products are PHYSICALLY INCOMPATIBLE or NOT RECOMMENDED
	bentazone
	clopyralid
	ethofumesate + phenmedipham
	fenoxaprop-p-ethyl
	lenacil
	metamitron
	metazachlor
	metsulfuron - methyl

	metsulfuron - methyl + thifensulfuron - methyl napropamide pendimethalin phenmedipham propyzamide pyridate

Zynergy

Physically Compatible	
Third party products (active ingredients)	OMEX Range
abamectin	Bio 20
azoxystrobin	Bio 18
benzovindiflupyr	CalMax
bixafen + prothioconazole	CalMax Ultra
bupirimate	DP98
chlormequat	Kickstart
cymoxanil + mancozeb	Folex High N
cymoxanil + famoxadone	Foliar Supreme
cymoxanil + fluazinam	Folex B
cypermethrin	Folex P
cyazofamid	Folex PZ
dimethomorph + mancozeb	Folex Cu
fenhexamid	Folex Se
fenpicoxamid	Folex Mg
fluazinam	Folex MU 35
fluopicolide + propamocarb hydrochloride	Folex N
fluoxastrobin + prothioconazole	3 X Solution
fluxapyroxad	Folex Zn
fluxapyroxad+ metconazole	Folex K
fluxapyroxad + pyraclostrobin	K50
fluoxastrobin + prothioconazole	Kelpak
imazamox + quinmerac	Micromex
kresoxim methyl	Manganese 17.5%
lambda-cyhalothrin	NA13
mancozeb	Sulphomex
mancozeb-metalaxyl-m	SuperMn
mandipropamid	SW7
metalaxyl-m	Vitomex
metconazole	Clear fertiliser (eg 7-20-0; 17-8-0)
prochloraz	
prothioconazole	
prothioconazole + tebuconazole	
tebuconazole	
tebuconazole + trifloxystrobin	
sulfoxaflor	
sulphur	
	The following products are PHYSICALLY INCOMPATIBLE or NOT RECOMMENDED
	laminarin
